

## 2) Water management

The Company has managed water resources, which is an important factor in the production of maintenance and inspection of the water supply system within the production process to meet the standards continuously.

### Water Efficiency

Water Efficiency		2021	2022	2023
Water efficiency target	Water consumption amount (dbm)/ amount of precipitate (tones)	11.00	11.00	11.00
Actual water efficiency,	water consumption (dbm) amount of produced glue (tones)	9.04	9.76	8.32
Water consumption (ppm)		35,456	35,842	36,541
Real production volumes (ton)		3,450	3,920	4,390
