

5) Environmental Activities

The company is always aware of the business operations that may have environmental impacts on society and nearby communities. As a result, the company focus on developing a better environment preservation system which can be seen from the company's policy to continuously promote and support environmental activities. However, doing such activities started from within the company to the outside society, such as forest planting activities and pouring bio-extract water, etc.

- In the past year, the Company received an Environmental Award from a customer company on August 4, 2022.

- Reforestation activities under the project "Toyota 60th Anniversary Planting 600,000 Trees" at the factory Bang Pakong, Chachoengsao Province on October 20, 2022

- The company together with Bangchan Industrial Estate poured bio-extracted water, on the occasion of World Environment Day on December 2, 2022, at the gutter area in front of the company employment.
