

Water Management

The company manages water resources to enhance efficiency and optimize water usage, recognizing its importance as a key factor in production. Regular maintenance and inspections of the water supply system within the production process are conducted to ensure compliance with established standards continuously.

Ton

Water Efficiency	2022	2023	2024
Water efficiency target Water consumption amount (dbm)/ amount of precipitate (tones)	11	11	11
Actual water efficiency, water consumption (dbm) amount of produced glue (tones)	10	8	8
Water consumption (ppm)	35,842	36,541	35,261
Real production volumes (ton)	3,920	4,390	4,314
